-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

*Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-14, drawn to assembling a core foundry class that includes a group of individuals each with a specific expertise, assembling companies for development, and assigning an individual to one of the companies to provide expertise to that company, classified in class 705, subclass 8.
  - II. Claims 15-19, drawn to reviewing a number of business plans to determine the mostly likely plans to be successful, assisting the creation of companies based on these plans, and reviewing the progress of the companies based on metrics, classified in class 705, subclass 10.
  - III. Claims 20-21, drawn to a software structure for gathering, storing, and retrieving data related to member companies, classified in class 705, subclass 11.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as joining preexisting companies and offering these companies experts to supplement expertise areas the companies lack (i.e. there is no software structure for managing data, as with group III, and there is no forming a company by selection of a business plan and monitoring progress as with group II). Invention II has separate utility such as forming a company by selection of a successful business plan and monitoring progress of that company (i.e. no panel of experts and matching experts to

preexisting companies as with group I and no use of the specific software structure as with group III). Invention III has the separate utility of gathering, storing, and retrieving data using a software structure made up of programs and routines (i.e. no panel of experts and matching experts to preexisting companies as with group I and no forming a company by selection of a business plan and monitoring progress as with group II). See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, the search required for Group II is not required for Group III, and the search required for Group I is not required for Group III, restriction for examination purposes as indicated is proper.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Beth Van Doren whose telephone number is (571) 272-6737. The examiner can normally be reached on M-F, 8:30-5:00.
